Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, and 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Beckerman'392 or Reynolds '034.

The patent to Beckerman discloses a single phase AC motor speed control system. Beckerman shows in figure 3 a winding 26 connected in series with a capacitor 30, and a second winding 24 is connected to a switch 34. Beckerman discloses at column 2 line 58-59 that the phase shifted by 90 degrees due to the presence of the capacitor 30. Beckerman further discloses means for detecting the position of the rotor cooperating with a power supply 28 to control the switch (34).

The patent to Reynods discloses an emergency power system for capacitor start motors. Reynods shows in figures 1 and 2 a winding 16 and a second winding 17 connected in series with a capacitor 18 connected by a switch 19. Reynods discloses at column 3 line 58 and column 4 line 20 of 90 degrees phase shifted due to the presence of the capacitor 18.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2837

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35

U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beckerman '392 or Reynolds '034 in view of Studtmann'101.

Claims 4-8 further require a rotor position sensor for sensing the rotor position

However, the patent to Studtmann discloses a starting system for chopper controlled motor commutated thyristor inverter comprising a synchronous motor and a shaft position sensor for sensing the rotor position. Prima facie case is made that the patents to Beckerman and Reynolds detect the motor speed for controlling the motor windings. Since the use of a speed detector or a position detector for motor control is well known in the art, it would have been obvious to one of ordinary skill in the art to

Art Unit: 2837

provide Beckerman or Reynolds with the rotor position detector as taught or suggested by Studtmann.

Response to Arguments

5. Applicant's arguments filed 01/22/02 have been fully considered but they are not persuasive.

It is believed that the references read on the present claims as they have been amended.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
